BLESS ZAGLAGO

Computer Science Student | Aspiring Machine Learning Engineer

PROFESSIONAL SUMMARY

Level 200 Computer Science student at Ghana Communication Technology University. Cumulative GPA 3.64. Focused on becoming a Machine Learning Engineer.

I build things. I built a neural network from scratch using only NumPy — forward pass, backpropagation, gradient descent, all written by hand. I've earned certifications in AI, Python, and SQL from Oracle, Cisco, and IBM. I'm currently studying linear algebra and applying for the Deep Learning Specialization.

I'm open to remote internships and opportunities where I can keep building.

PROJECTS

Neural Network from Scratch

Personal Project

- Built a feedforward neural network using only NumPy. No PyTorch, no TensorFlow.
- Implemented forward pass, ReLU and Softmax activations, cross-entropy loss, backpropagation, and gradient descent by hand.
- Trained on the Iris dataset. Loss dropped from 1.09 to 0.06 over 1000 epochs. Test accuracy: 100%.

Automated Job Application Bot

Personal Python Project

- Building a Python bot that automates the process of finding and applying to job listings.
- Uses web scraping and form automation to reduce manual application time.
- Self-directed project to deepen practical Python and automation skills outside coursework.

SmartEvents — Unified Web-Based Event Management & Ticketing System

Systems Analysis & Design Project, GCTU

- Contributing to the design and development of a centralized web-based event management platform covering event creation, multi-tier ticketing, online registration, QR-code check-in, and reporting dashboards.
- Produced requirement-gathering documentation including SRS, UML, and ER diagrams as part of a team following a formal systems-analysis process.
- Working with HTML, CSS, JavaScript, PHP, and MySQL to support planned front-end and back-end features.

- github.com/blesszaglago-cmd

SKILLS

- I will get it done

Programming:

- Python, SQL

Data & ML:

- NumPy, Pandas, Scikit-learn
- Data Handling
- SQL & Relational Databases
- Neural Networks

Tools:

- GitHub, Jupyter, Docker (learning)

CERTIFICATIONS

- Oracle Cloud Infrastructure AI Foundations Associate — Oracle (September 2026)
- Oracle Certified Foundations Associate, Agentic AI — Oracle (August 2026)
- Introduction to Modern AI — Cisco (September 2026)
- Data Science Essentials with Python — Cisco (September 2026)
- SQL and Relational Databases 101 — IBM (September 2026)
- AWS for Beginners — Simplilearn (September 2026)

EDUCATION

BSc. Computer Science (in progress)
Ghana Communication Technology University
Level 200, expected 2027

- Cumulative GPA: 3.64 (First-Year GPA: 3.68)
- Relevant coursework: Data Structures & Algorithms, Probability & Statistics, Database Management Systems.

West African Senior School Certificate (WASSCE)
Anlo Senior High School | 2024

- General Science: Mathematics Core (B2), Mathematics Elective (B3), Chemistry (B3), Physics (B3), ICT (B3).

ADDITIONAL

- Attended US-Africa Nuclear Energy Summit (USANES) 2026 — AI and Nuclear Workforce sessions.
- Studying linear algebra independently with 3Blue1Brown.
- Committed to a weekly build series: one real ML project every Tuesday.
